**Why This Matters Right Now**

Milwaukee families should not have to wait until a crisis to know where to go for care, food, safety, or support. As healthcare instability, rising community needs, and service access gaps continue to impact neighborhoods across Milwaukee, this event is creating a stronger, more visible entry point for residents to find real help in one trusted space.
By bringing together three established community movements - violence prevention, health care access and food security - into one unified experience under Community Unity Weekend 2026, this collaboration will:

- Expand access to critical services
- Strengthen trusted community partnerships
- Reduce barriers to care and support
- Increase visibility of available resources
- Create greater impact for Milwaukee families

Because there is no cost, residents can show up, connect, learn, get resources, and build stronger community ties - all without access challenges.

**A Day Built for the Whole Community**

This event is especially for:

- Individuals and families seeking healthcare, insurance, or wellness support
- Youth, caregivers, and families looking for resources and activities
- Residents impacted by violence, trauma, food insecurity, or instability
- Community members who simply want to know what help is available before they need it
